

ST ALUM

STC 150 / STC E 150 / STW 150

Charnière en aluminium avec un design spécial grâce auquel une aile s'emboîte dans l'autre, ce qui offre une épaisseur exceptionnellement fine (2,5 mm). Il n'est plus donc nécessaire, dans la plupart des cas, de réaliser un encastrement.

Matériaux extérieur

- aile: aluminium anodisé
- bouchon de réglage: zamac
- rondelles de séparation: polyamide

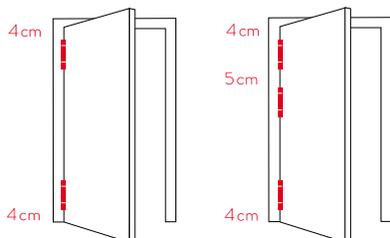

Matériaux intérieur

- axe intérieur: acier inoxydable AISI 304
- ressort intérieur: paquet de lamelles acier au carbone avec graisse de protection

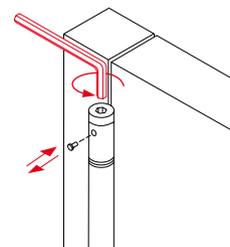

Fonctionnement

- application: adaptée pour intérieure/ extérieure
- retour automatique: oui
- puissance réglable: oui
- ouverture maximale de fonctionnement: 180°
- cycles: plus de 500.000

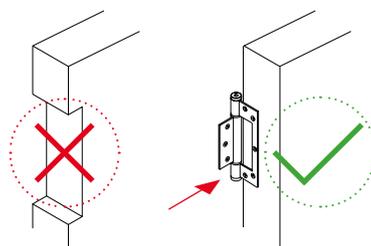

Installation correcte 2 et 3 charnières

Tension

Installation sans retrait

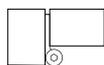

3 points de tension
