

ST ALUM

STC 150 / STC E 150 / STW 150

Cerniere in alluminio con un disegno particolare dove una bandella lavora dentro l'altra, offrendo uno spessore totale eccezionalmente ridotto (2,5 mm) che permette, in molti casi, di evitare l'incasso.

Materiali esterni

- bandella: alluminio anodizzato
- tappo regolazione: zamac
- rondelle: poliammide

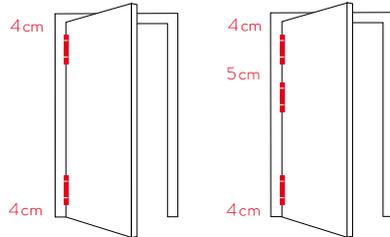

Materiali interni

- asse all'interno: acciaio inox AISI 304
- molla interna: set lamiera d'acciaio al carbonio con grasso protettore

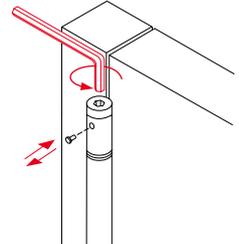

Funzionamento

- applicazione: adatto per porte interne/esterno
- ritorno automatico: sì
- regolatore di potenza: sì
- apertura massima: 180°
- cicli: più di 500.000

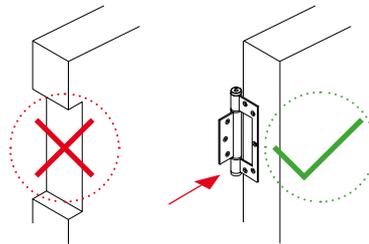

Corretta installazione 2 e 3 cerniere

Tensione

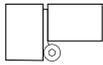

Installazione senza incasso

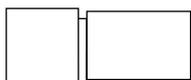

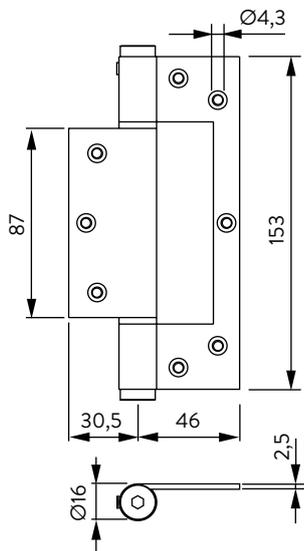

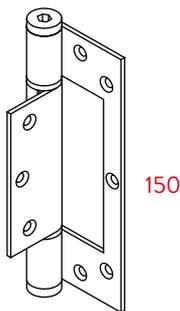

3 punti di tensione
