A company formed by a team
whose mission is to manufacture
all **Justor** products with the
highest quality and warranty

Objective: quality assurance, prestige and brand pride

The **Justor** spring hinges are fittings designed to ensure smooth automatic closing of all types of doors, windows, covers, etc.

Designed in **aluminum, stainless steel, iron and/or plastic**, our wide range of products offers solutions for single acting doors as well as double acting doors (swing doors).

With a distinguished **spring system** consisting of a set of **blades** working by torsion, lifetime of these products can reach up to 500.000 opening and closing cycles. The strength of the spring is always adjustable and the loading capacity of these products can be up to 250 kg, depending on chosen product and finishing.

Solutions for all types of doors

10

Manufacturers since 1946, our spring hinges are sold in over 70 countries. The reason for this success is that we meet the **different needs** demanded in such diverse industries as metal, wood, food, health, aeronautics, etc. and in all types of indoor and outdoor architecture projecting today.

Common considerations for all hinges

spring system

Our spring system is composed of a set of blades that works by torsion and underlies the high performance of our spring hinges.

Either **iron** or **stainless steel**, the quality of material used in its manufacturing, its high resistance to breakage and deformation and its optimum elasticity makes a big difference on the market between a **Justor** spring hinge and a normal spring hinge.

Until today there isn't an equal spring system used to assemble spring hinges, this is a very important fact because this element is what really determines the door weight capacity, as well as the opening/closing cycles, namely, the lifetime cycles of the product.

aluminum

double action
DA series

DA 120
DA 180

DA double action

DA 120 DA 180

Hinges for swing doors, conceived for a lot of transit. Available in 3 different widths, 30 mm, 40 mm and 50 mm (only DA 180 model), they provide a solution to any need.

Uses

Clinic and hospital doors, industrial and design kitchens, interior entries to warehouses and shops in general.

Features

For wooden and aluminum doors. Spring resistance 500.000 opening and closing cycles. Available in silver, gold, bronze, white and black. Possibility of manufacturing in other colors. Finishings with straight edge (90°) and round edge (R=10).

aluminum

double action
DA series

DAW 120
DAW 180

20

DA double action

DAW 120 DAW 180

Hinge designed for direct mounting on frame or wall, without milling or rebating. **It reduces up to 50% assembly time compared to a conventional spring hinge.**

Uses

Especially suitable in applications for woodwork in restoration and interior architecture.

Features

Exclusively available in anodized aluminum, finishing in various colors. High resistant polyamide washers, zamak chrome or black cap (depending on model) and galvanized steel pins. DAW 180 model available in 2 different widths, 25-35 mm and 35-45 mm. Adjustable closing power and high loading capacity. More than 500.000 lifecycles.

aluminum

double action
DA series

DA R40 180

AL

DA double action

DA R40 180

Specifically made for the aluminium market, this hinge adapts perfectly to all kinds of swing doors with R40 profile. This is possible thanks to the specific design of each of its blades, which facilitates its fitting within the profile itself, achieving an almost perfect functioning.

Uses

Sports facilities, exhibition centers, pharmaceutical laboratories and spray booths.

Features

3-points of force intensity, easily adjustable. Optimal work efficiency with 2 hinges assemblies, as well as 3 hinges installations. Load capacity up to 65 kg.

DA R40 180

stainless steel

double action
DA series

DA 120
DA 180

24

DA double action

DA 120 DA 180

Prepared to work in especially harsh environments. Available in stainless steel **AISI 304** and **AISI 316** stainless steel, better known as “Marine Steel”.

Uses

Coastal facilities, nautical industry, saline environments, food industry and livestock sector among others.

Features

Polished stainless steel, sintered caps and washers **AISI 316**, pins and inner shaft **AISI 304**. Stainless steel inside leaf spring **AISI 301**, covered with corrosion protective grease, especially suitable for marine environments. DA 180 available in 2 different widths, 40 mm and 50 mm.

iron

double action

DA 120
DA 180

26

IRON

DA double action

DA 120 DA 180

Hinge prepared for traditional installation to be fixed with screws, as well as for installation by welding on frame and door.

Uses

Accesses to transport machinery, internal factories passages and metal industry in general.

Features

Finish in galvanized steel. Force adjustment with pin. Maximum performance even with minimum tension. Capacity up to 20 kg per hinge (see application table).

DA
120

DA
180

AL

DA double action

DP 120

Double action spring hinge for swinging doors. Easy and fast installation. It is installed directly without milling frame or door.

Uses

Light doors to access pharmacy counters, bars or other food and catering stores.

Features

It allows to dismantle the door without having to unscrew the pin. Just 2,7 mm thick. Load capacity up to 20 kg. Double action spring hinge 120 mm length, 3 possible tension points of the inner spring. Available in aluminum in silver, gold, bronze, white and black finish.

SA single action

SA 120 SA 180

It allows installation by welding providing the same performance as by fixing with screws. The steel hinges provide the same work performance as the aluminum or stainless steel hinges.

Uses

Pedestrian accesses, private homes, boiler works, external fencing, metal constructions, forge works.

Features

Galvanized Steel. Easy strength adjustment. High load capacity. 3 mm thick blades. Minimum of 500.000 working cycles.

aluminum

single action
ST series

STW 150
STC 150

ST series

STW STC 150 150

Hinges with a special design, where the blade works inside the other blade, providing exceptional thinness, no need to rebate.

Uses

Any type of light interior doors like offices, archives, cabinets...

Features

In the **STW** version, the blades are displaced from the axis of the hinges, allowing direct installation to any surface without sub frame.

STC version has two different blade lengths, providing solutions to existing frameworks in different thicknesses.

SST

ST series

STW STC 150 150

Spring hinges made of stainless steel AISI 304. Just 2,5 mm thick. Respects the natural space between frame and door. **Reduces assembly time since it can be installed directly without milling frame or door.**

Uses

Interior design, sports facilities, health centers and food industry.

Features

Stainless steel AISI 304. Lower axis fixed. Washers and pins in marine AISI 316. Adjustable closing strength.

STW
150

STC
150

30

AL

SF SF series

SF 120

Overlapping single action hinge, specially indicated for installations in phenolic and/or similar materials.

Uses

Doors in exhibition stands, fencing doors, call centres.

Features

Available in aluminum, presented in various colors. Round edge finish. Total length of only 120 mm. Load capacity up to 40 kg. More than 300.000 opening and closing cycles.

spring hinge

 **Justor**

AL

spring hinge

MB

spring arm

MB

Easy installable product. Possibility to easily enable or disable spring function.

Uses

Bathroom doors, storage rooms, stores and interior doors in general.

Features

Easy adjustable spring strength. Endurance of more than 250.000 work cycles. Aluminum finishing in various colors. Special model for outdoor installation.

MB

MP spring hinge

spring hinge MP

Perfect for installation as third hinge on doors, in order to close the door automatically.

Uses

Wardrobe doors, changing rooms, offices and others.

Features

Complementary product on doors with already-existing hinges. Pushes doors up to 40 kg. More than 200.000 work cycles. Anodized aluminum finishing and presented in blister package. To be installed at the center of the door allowing an automatic closure.

MP

spring hinge

PM

spring loaded paumelle PM

For wooden doors. Makes installation easier, not necessary to unscrew the hinges if removing the door is necessary at any given time.

Uses

Cottages, apartments, hotels, schools and convention centers.

Features

Made of aluminum exclusively for woodwork. 120 mm length. For interior doors. Load capacity up to 20 kg. Available in left and right models according to installation.

PM

AL

PF spring hinge

frontal paumelle

PF

Especially suitable for installations on phenolic materials or similar, this overlapping single action spring hinge allows to remove the door easily.

Uses

Doors in public services, changing rooms, showers in campsites and sports centers.

53

Features

The total length of the product is 90 mm. More than 250.000 work cycles. Available in aluminum (silver finish, gold, bronze, white or black). Load capacity up to 15 kg.

PG spring hinge

Drop Hinge with bearing

PG 180 CR PG 240 CR PG 240 CRP

Hinges with smooth opening and closing actuation due to bearing on the central axis, instead of washer, which practically doubles its capacity.

Uses

Gate fences, furnaces, private gardens, doors of industrial lifts, exterior architecture in stainless steel.

Features

Made of steel or stainless steel. It comes in 180 mm and 240 mm length. High load capacity, for doors up to 250 kg in weight. Components are manufactured in stainless steel AISI 304 and AISI 316, offering high corrosion resistance.

60

PP spring hinge

Blade Hinge with washer

PP 240

Hinge built with 2 steel profiles. The upper pushes the door, by working on the lower washer, which is welded to the frame.

Uses

Warehouse doors, spray cabins, livestock accesses, fencing accesses.

Features

Pushes, but does not carry the weight of the door. Single length of 240 mm. High resistance to deformation. 3 positions adjustable force. Opening up to 180°.

PP 240

IRON

spring hinge

PPM CR

Blade Hinge with bearing

PPM 240 CR PPM 240 CRP

Blade hinges with bearing for installation on doors by screwing. Smooth opening and closing thanks to the bearing on the central axis.

Uses

Heavy doors mainly wooden. Fences, gates, industry, sports centers, etc.

Features

Same hinge for left and right opening. 2 different models available. Single length of 240 mm in both models. Load capacity up to 150 kg (CRP model). Made of zinc-plated steel.

If you wish to know more about Justor products, have a look at the **general catalogue of Talleres Trepat S.A.** and discover other solutions and our **Blue Line**.

You can also visit our online page www.justor.com

Our products

Door closers. Available with arm set. Ready to resist frequent and/or intensive usage, on doors up to 120kg.

Retaining brakes. They prevent doors from slamming and ensure the total and silent closing of the door.

Hinges. Always with a laminated spring set inside, for all types of doors, from screen doors of only 5kg to swing doors of 60kg and iron doors of 250kg.

Blue Line

Antipanic. 100% reversible. Certified to be installed on fire doors.

Pin door. Sliding and sliding flush bolts for all types of doors and windows.

Complements. Complementary products for doors and windows. Addressed to the professional field of aluminium and wood.
