A company formed by a team
whose mission is to manufacture
all **Justor** products with the
highest quality and warranty

Objective: quality assurance, prestige and brand pride

The **Justor** spring hinges are fittings designed to ensure smooth automatic closing of all types of doors, windows, covers, etc.

9

Designed in **aluminum, stainless steel, iron and/or plastic**, our wide range of products offers solutions for single acting doors as well as double acting doors (swing doors).

With a distinguished **spring system** consisting of a set of **blades** working by torsion, lifetime of these products can reach up to 500.000 opening and closing cycles. The strength of the spring is always adjustable and the loading capacity of these products can be up to 250 kg, depending on chosen product and finishing.

Solutions for all types of doors

Manufacturers since 1946, our spring hinges are sold in over 70 countries. The reason for this success is that we meet the **different needs** demanded in such diverse industries as metal, wood, food, health, aeronautics, etc. and in all types of indoor and outdoor architecture projecting today.

Common considerations for all hinges

aluminum

silver .01

gold .02

bronze .03

cap

Common considerations for all hinges

spring system

Our spring system is composed of a set of blades that works by torsion and underlies the high performance of our spring hinges.

Either **iron** or **stainless steel**, the quality of material used in its manufacturing, its high resistance to breakage and deformation and its optimum elasticity makes a big difference on the market between a **Justor** spring hinge and a normal spring hinge.

Until today there isn't an equal spring system used to assemble spring hinges, this is a very important fact because this element is what really determines the door weight capacity, as well as the opening/closing cycles, namely, the lifetime cycles of the product.

DA double action

DA 120 DA 180

Double action spring hinge for swinging doors, conceived for a lot of transit doors. Available in 3 different widths, 30 mm, 40 mm and 50 mm (only DA 180 model), they provide a solution to any need.

19

Uses

Clinic and hospital doors, industrial and design kitchens, interior entries to warehouses and shops in general.

Features

- Made of aluminum
- For wooden and aluminum doors
- Available in silver, gold, bronze, white, black and other special colors
- Model of 120 or 180* mm
- Profile of 30, 40 or 50* mm
- Finishings with straight (90°) or round edge (R=10)
- 500.000 opening and closing cycles
- Load capacity up to 90 kg

AL

DA double action

DAW 120 DAW 180

Double action spring hinge for swinging doors designed for direct mounting on frame or wall, without milling or rebating. It reduces up to 50% assembly time compared to a conventional spring hinge.

21

Uses

Especially suitable in applications for woodwork in restoration and interior architecture.

Features

- Made of aluminum
- For wooden and aluminum doors
- Available in silver, gold, bronze, white, black and other special colors
- Model of 120 or 180* mm
- Profile of 25-35 or 35-45* mm
- Finishings with straight (90°) or round edge (R=10)
- 500.000 opening and closing cycles
- Load capacity up to 70 kg

AL

DA double action

DA R40 180

Double action spring hinge for swinging doors specifically made for the aluminium market, this hinge adapts perfectly to all kinds of swing doors with R40 profile. This is possible thanks to the specific design of each of its blades, which facilitates its fitting within the profile itself, achieving an almost perfect functioning.

23

Uses

Sports facilities, exhibition centers, pharmaceutical laboratories and spray booths.

Features

- Made of aluminum
- For doors with R40 aluminum profile
- Available in silver, gold, bronze, white, black and other special colors
- Model of 180 mm
- Special profile for R40
- Finishings with straight edge
- 500.000 opening and closing cycles
- Load capacity up to 65 kg

If you wish to know more about Justor products, have a look at the **general catalogue of Talleres Trepas S.A.** and discover other solutions and our **Blue Line**.

You can also visit our online page www.justor.com

Our products

Door closers. Available with arm set. Ready to resist frequent and/or intensive usage, on doors up to 120kg.

Retaining brakes. They prevent doors from slamming and ensure the total and silent closing of the door.

Hinges. Always with a laminated spring set inside, for all types of doors, from screen doors of only 5kg to swing doors of 60kg and iron doors of 250kg.

Blue Line

Antipanic. 100% reversible. Certified to be installed on fire doors.

Complements. Complementary products for doors and windows. Addressed to the professional field of aluminium and wood.
