

CO DOOR SELECTOR

CO - DOOR SELECTOR

In accesses with a double door, it always ensures the closing of the passive leaf prior to the active one, thus ensuring a safe and correct closing, this being particularly important in fire doors. Reversible wheel mechanism. Wheels with 30 mm diameter. Adjustable angle bolt. More than 500.000 cycles. Chrome finish. In compliance with EN1158 norm and CE marking.

Materials

- body: chromed steel

Performance

- mechanism: wheel mechanism
- closing system: the system keeps the first sheet open during the closing of the second sheet
- reversible mounting

Certificate

EN 1158: 1997 +/ A1:2003
3-5-3/4-1-1-3
