

FR SST

FR 0 / FR 1 / FR 2 / FR 3

The retaining brake eliminates door slams. Manufactured in stainless steel, this tool is designed to work under the most unfavourable weather conditions. It operates in the last 10°, thus ensuring the complete closing of the door. Adjustable closing speed in between 1 and 10 seconds (G models).

SST MODEL

Outside materials

- cylindrical body: anodized aluminum.
- other external components: stainless steel AISI 304 (polished)
- hook: stainless steel AISI 304 (polished)
- pins: steel
- wheel: synthetic rubber

Inside materials

- hydraulic oil
- inner spring: special

Performance

- mechanism: hydraulic system
- closing system: possibility of fixed or adjustable closing speed (G models)
